

# WHAT DOES A METAL FINISHING FACTORY DO?

"MAKE METALS  
PERFORM BETTER"

ADDING ZINC TO ANOTHER METAL CAN PREVENT CORROSION - THINK ABOUT KEEPING CARS FROM RUSTING.

ADD NICKEL TO ANOTHER METAL, AND IT CAN WITHSTAND VERY HIGH HEAT - LIKE ROCKET EXHAUST.

ADD TIN TO ANOTHER METAL, AND NOW IT IS A GREAT CONDUCTOR OF ELECTRICITY - THINK ELECTRONICS.

## CHEMISTRY & ELECTRICITY - THAT'S WHAT METAL FINISHING FACTORIES DO!
